Career Overview

AI & Data Science student with strong foundations in artificial intelligence, machine learning, data analytics, and cybersecurity fundamentals. Skilled in Python, TensorFlow, data handling, and analytical workflows, with additional exposure to network security concepts, Linux environments, and vulnerability assessment tools. Focused on building intelligent, data-driven, and secure technology solutions.

Education

B.Tech in Artificial Intelligence & Data Science – Nehru Institute of Engineering & Technology, Coimbatore (2022–2026) | CGPA: 7.9

Technical Skills

Languages: Python
Libraries: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, OpenCV, TensorFlow, SciPy
Version Control: Linux, GitHub, VS Code, Google Colab
Tools: Steganography, SET, Cisco Packet Tracer, Splunk
Domains: CyberSecurity & Networking

Internship

CyberSecurity & Ethical Hacking Virtual Intern – (ApexPlanet Software Pvt Ltd, AICTE) (Nov 2025 – Jan 2026)

Gained practical experience in cybersecurity by performing web application penetration testing, vulnerability analysis, and incident response as part of the ApexPlanet internship. Worked extensively with OWASP Top 10 vulnerabilities.

CyberSecurity Virtual Intern - (Edunet Foundation, IBM SkillsBuild, AICTE) (May 2025 – Jun 2025)

Gained hands-on exposure to cybersecurity fundamentals, network security, Linux tools, and vulnerability assessment practices. Strengthened understanding of secure system operations and the role of AI/ML in modern security workflows

Networking Virtual Intern - (Juniper Networks, Cloud & Automation Academy, AICTE) (Jul 2024 – Sep 2024)

Learned core concepts of networking, routing/switching, automation, and cloud-driven network architectures. Developed practical skills in network configuration, troubleshooting, and understanding scalable enterprise networks.

Professional Experience

Artificial Intelligence & Internet of Things Intern (Enthu Technology Solutions Pvt Ltd) (Oct 27 – Nov 26, 2025)

- Worked with sensor-based IoT systems, integrating IR and ultrasonic sensors with Raspberry Pi for real-time environment monitoring and data collection.
- Performed Excel-based data logging, preprocessing, and basic ML model building to classify sensor readings and automate alert behaviors.
- Developed Python scripts to read sensor data, control GPIO components (LEDs, IR, Ultrasonic), and generate structured datasets for analysis.
- Used Google Colab for model training, evaluation, and tuning, ensuring clean workflows for dataset preparation and prediction testing.
- Gained hands-on experience in combining AI techniques with IoT hardware to build simple automation and monitoring solutions.

Projects

- **Smart Environment Monitor (IR + Ultrasonic + Machine Learning) Project** - Hardware Project integrating IR and ultrasonic sensors with machine learning.
- **Web Application Penetration Testing Using DVWA** - Performed hands-on web application penetration testing using DVWA to identify vulnerabilities such as SQL Injection, XSS, and command injection
- **Network Topology Simulation Project** - the design, configuration, and simulation of network topologies using Cisco Packet Tracer.

Certifications

- CyberSecurity Proficiency Badge – Credly (IBM Skillsbuild)
- Networking basics – Cisco Networking Academy
- CyberSecurity Professional Course - Coursera(IBM)
- CyberSecurity Professional Course – Coursera(Google Cloud)
