AKKSAI PRATHAAN M

akksaiprathaanmanivannan@gmail.com 8870417121

https://www.linkedin.com/in/akksai-prathaan-m-ba8b75297 Coimbatore, India

PROFESSIONAL SUMMARY

AI & Data Science student with strong foundations in Artificial Intelligence, Machine Learning, and Generative AI concepts. Skilled in Python, TensorFlow, data analysis, and model development, with hands-on exposure to building intelligent and data-driven solutions. Passionate about applying AI/ML and GenAI techniques to solve real-world problems and create impactful technologies.

EDUCATION

Bachelor of Technology (B.Tech) in Artificial Intelligence and Data Science, (2022 – 2026)
Nehru Institute of Engineering and Technology, Coimbatore. CGPA: 7.9
Affiliated to Anna University.

TECHNICAL SKILLS

- Generative AI: LLMs, Prompt Engineering,, NLP, RAG, AI Agents, Agentic AI.
- Programming Languages: Python.
- AI & ML: OpenCV, CNN, TensorFlow & Keras, ScikitLearn, MediaPipe, Deep Learning, EDA
- Version Control & Tools: Linux, GitHub, Google Colab, VS Code, Eclipse.

PROFESSIONAL EXPERIENCE

Artificial Intelligence & Internet of Things Intern (Enthu Technology Solutions Pvt Ltd) (Oct 27 – Nov 26, 2025)

- Worked with sensor-based IoT systems, integrating IR and ultrasonic sensors with Raspberry Pi for real-time environment monitoring and data collection.
- Performed Excel-based data logging, preprocessing, and basic ML model building to classify sensor readings and automate alert behaviors.
- Developed Python scripts to read sensor data, control GPIO components (LEDs, IR, Ultrasonic), and generate structured datasets for analysis.
- Used Google Colab for model training, evaluation, and tuning, ensuring clean workflows for dataset preparation and prediction testing.
- Gained hands-on experience in combining AI techniques with IoT hardware to build simple automation and monitoring solutions.

INTERNSHIP

AI/ML Virtual Internship - (Edunet Foundation, IBM SkillsBuild, AICTE) (May 2025 – Jun 2025)

Gained hands-on exposure to AI/ML fundamentals, data preprocessing, and model training using real-world datasets, Strengthened understanding of machine learning algorithms, model evaluation, and basic deep learning concepts.

Data Science & Machine Learning Virtual Internship - Ybi Foundation (June 2024-July 2024)

Completed a training program on data preprocessing, machine learning algorithms, and model evaluation techniques using Python and analytical tools.

PROJECT

- **Smart Environment Monitor (IR + Ultrasonic + Machine Learning) –** Designed and developed a hardware-based monitoring system integrating IR and ultrasonic sensors for real-time environment sensing. Implemented machine learning techniques to analyze sensor data and detect patterns or anomalies. The project enhanced understanding of sensor integration, data processing, and intelligent decision-making in embedded systems.
- **Face & Emotion Recognition Project** - A computer vision application that detects faces and identifies human emotions using image processing and ML techniques.
- **Hand Gesture–Based Control for Hill Climb Racing –** Developed a system to control the accelerator and brake of the Hill Climb Racing game using real-time hand gesture recognition, enabling touch-free gameplay through computer vision–based gesture detection and mapping.

CERTIFICATION

- Machine Learning Professional Course - Coursera(IBM)
- AI Engineering Professional Course - Coursera(IBM)
- Generative AI Professional Course - Coursera(IBM)
- Prompt Engineering Proficiency badge – Future Skills Prime
- Generative AI for Developers Professional Certification – Coursera(AWS)
- Generative AI Leader Professional Certification – Coursera(Google Cloud)
